

Job Description

Responsible for all aspects of technology. In collaboration with the founders you will architect the system, enhance the prototype and assist us launch the company. After the prototype is released you will be expected to design and develop a more scalable, feature rich version of the system and recruit your own team to complete the development.

Skills

- experience developing a scalable, commerce enabled web site
- experience designing and developing a social networking application and searchable database system
- prefer engineering grad student, but a mature undergrad will be considered
- entrepreneurial

Company

A venture start up targeting the legal industry is looking for a talented, hands-on engineer/architect to help develop an exciting new Web 2.0 firm which combines elements of social networking, market-making and infrastructure outsourcing support. The ideal candidate will have hands on experience developing a commerce enabled Web 2.0 web site. The founders have business, engineering and legal backgrounds. You will also be involved in all aspects of the business, including helping the team obtain angel or venture capital funding
